**GOOD BETTER BEST**  
 PRODUCT RATING

- New 7" Round RD Series LED Warning lights from SoundOff Signal are attractively priced for school bus fleets to take advantage of low amp draw, reliability, better performance and reduced maintenance costs.
- Industry leading 8-way warning light system delivers the same intensity & light output with specially designed inner optics that increase off angle visibility for increased safety for your precious passengers.
- New reinforced metal screw bosses prevent cracking of the lenses due to overtightening of the screws during installation.
- Affixed neoprene gasket creates a tight seal when installed to prevent rusting and water damage to the school bus.
- Two operating modes: Mode 1 is Steady Burn, Mode 2 is Strobing Flash @ 10.4 f.p.s.
- UV Stabilized lens prevents sun fade.
