

**O6 Series with
Waterproof Mounting Flange**

7.79" w x 3.51" h x 1.42" d
Light features an integrated Waterproof Mounting Flange with AMP Sure Seal Connector and 6" of wire length.

Features

- NEW! One piece housing design features integrated waterproof mounting flange built right into the light. Flange prevents water from getting in behind the light and leaking into the interior of the vehicle. This reduces wood rot and metal corrosion issues associated with water and road chemicals.
- The Waterproof Mounting Flange is available for all three styles of our O6 Series (6" oval) Lights:
 - 1) Our **Premium O6 Series** Red Stop/Tail/Turn light (#ECVO64STT), and Yellow Front/Park/Turn lights (#ECVO64TY),
 - 2) Our **LD Series** Stop/Tail/Turn light (#ECVO64STT-LD) and LD Series Yellow Front/Park/Turn lights (#ECVO64TY-LD),
 - 3) and our **Dual Application Backup/Reverse light** (#ECVO64B2W).
- Dress up your light with our optional Stainless Steel Dress Ring, #ECVO64SSDR (see photo bottom left). Our Stainless Steel Dress Ring is for use with the O6 Series lights with Waterproof Mounting Flange only (ECVO64 models only).
- Light features a permanently adhered 3mm Closed Cell Gasket and AMP Sure Seal Connector.
- 5 Year No Hassle Warranty.

Waterproof Mounting Flange is available on our standard and LD Series STT, FPT and Backup/Reverse lights.

Stainless Steel Dress Ring #ECVO6SSDR (for use with waterproof mounting flange lights only).
