

ETL5000™ LED Full Size Lightbar

- **The most powerful & visible LED lightbar on the market**, the ETL5000™ exceeds SAE light requirements with end cap output alone!
- **DSC Technology (Digital Serial Communication)** provides 24 separate control lines (inputs) to connect to your switching devices (includes thin digital serial 15' RJ-11 cable which reduces installation time & expense)
- **Unique Rear Split Arrow modules** activate the upper row of LEDs against the bottom row of LEDs
- **LED Take Down, Work Light & Alley lights standard**
- **2 LED Alley Lights options:** Standard Flood or 15° Forward Facing that casts the light slightly forward for better & safer driver/passenger side viewing down dark alleys & streets
- **Streamlined, modular design**
- **Field replaceable modules**
- **Cruise Mode** turns on selected lights in low power mode
- **Low Power Mode reduces the brightness** to 30% power when needed
- **Many Lengths available** in 6 Modules at 38.5" (98 cm), 7 Modules at 43.25" (110 cm), 8 Modules at 48" (122 cm), 9 Modules at 52.75" (134 cm) & 10 Modules at 57.5" (146 cm)
- **Clear or Color Lenses in Amber, Blue or Red**
- **2 Mounting Options: Adjustable or Low Profile Fixed Mount (see page 20 for details).** Innovative Adjustable Mount bracket allows for custom height & tilt adjustments that is great for larger vehicles to increase lightbar visibility at specified angles. The Fixed Mount brackets offers a sleek, discreet mount, at just 3/4" (19 mm) above the roof most sedans
- **2 Rear Arrow Control options:**
4 Wire option with built-in Arrow Controller that works with any standard left, right or center out warning switch (compatible with the Directional Arrow Switch see pg. 25)
The 8 Wire option allows 8 arrow inputs which are compatible with other manufacturer's directional arrow controllers

Digital Serial Technology provides 24 separate control lines while reducing installation time & expense.

ETL5000 Lightbar shown on a Chevrolet Tahoe. Also shown: Intersector™ Under Mirror lights & LED3 lights on the grille.

Red Lens lightbar with Low Profile Fixed Mount bracket shown, see page 20 for more bracket info.

Blue Lens lightbar with Adjustable Mount bracket shown, see page 20 for more bracket info.
