

Interior Windshield and Rear Deck Lightbar Direct Connect Option

The Direct Connect (DC) option was designed for the added simplification of front and rear nFORCE interior lightbar installations.

As with the EPL8000 Pinnacle interior lightbar, breakout box installation is not required with this DC option.

Note the performance differences between the DC option and existing DSC Technology versions:

Direct Connect Option

- Available with single color lightbars only
- No breakout box included or required
- Non-programmable with SoundOff Signal software
- Available for four and eight module interior lightbars
- Installs and functions the same as the EPL8000

Existing DSC Technology (Breakout Box)

- Includes breakout box
- Standard with single, dual and tri-color interior lightbars
- Programmable with online Soundoff Signal software
- Standard with four or eight module interior lightbars

INTERIOR WINDSHIELD

REAR DECK

Windshield Split, Two-piece (shown) **#ENFWBFS**
Windshield Full, One-piece **#ENFWBFF**

Rear Deck **#ENFWBRF**
